I SPY NATURE

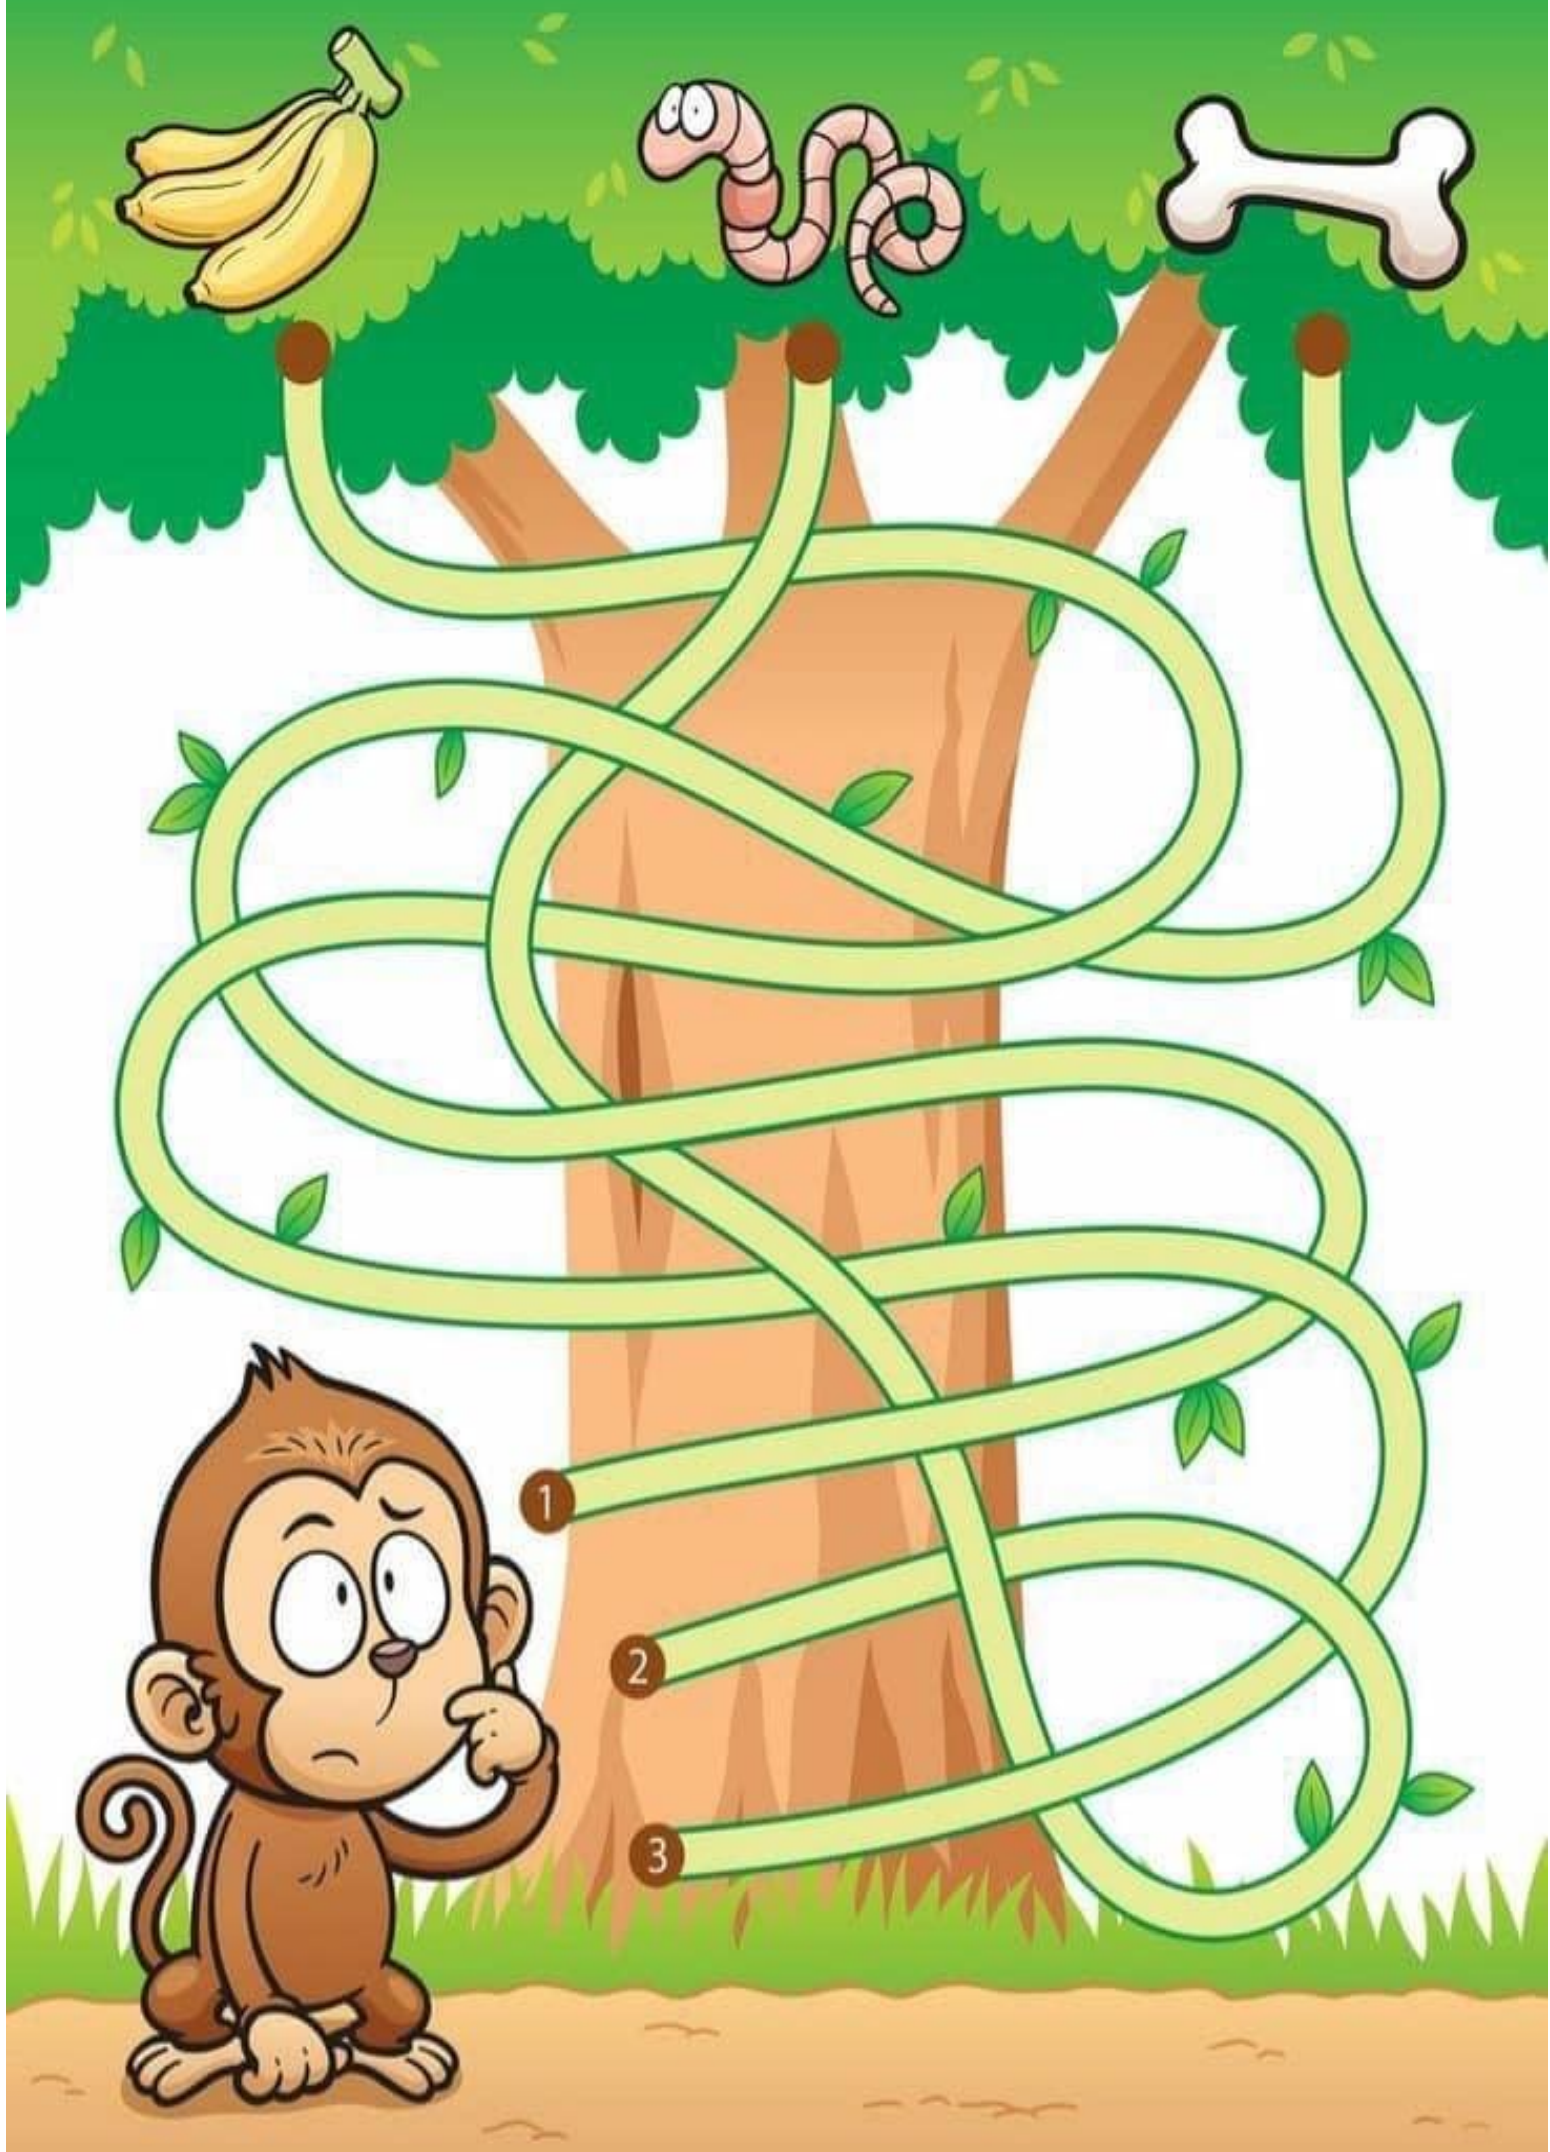

HOW MANY YOU SPY?

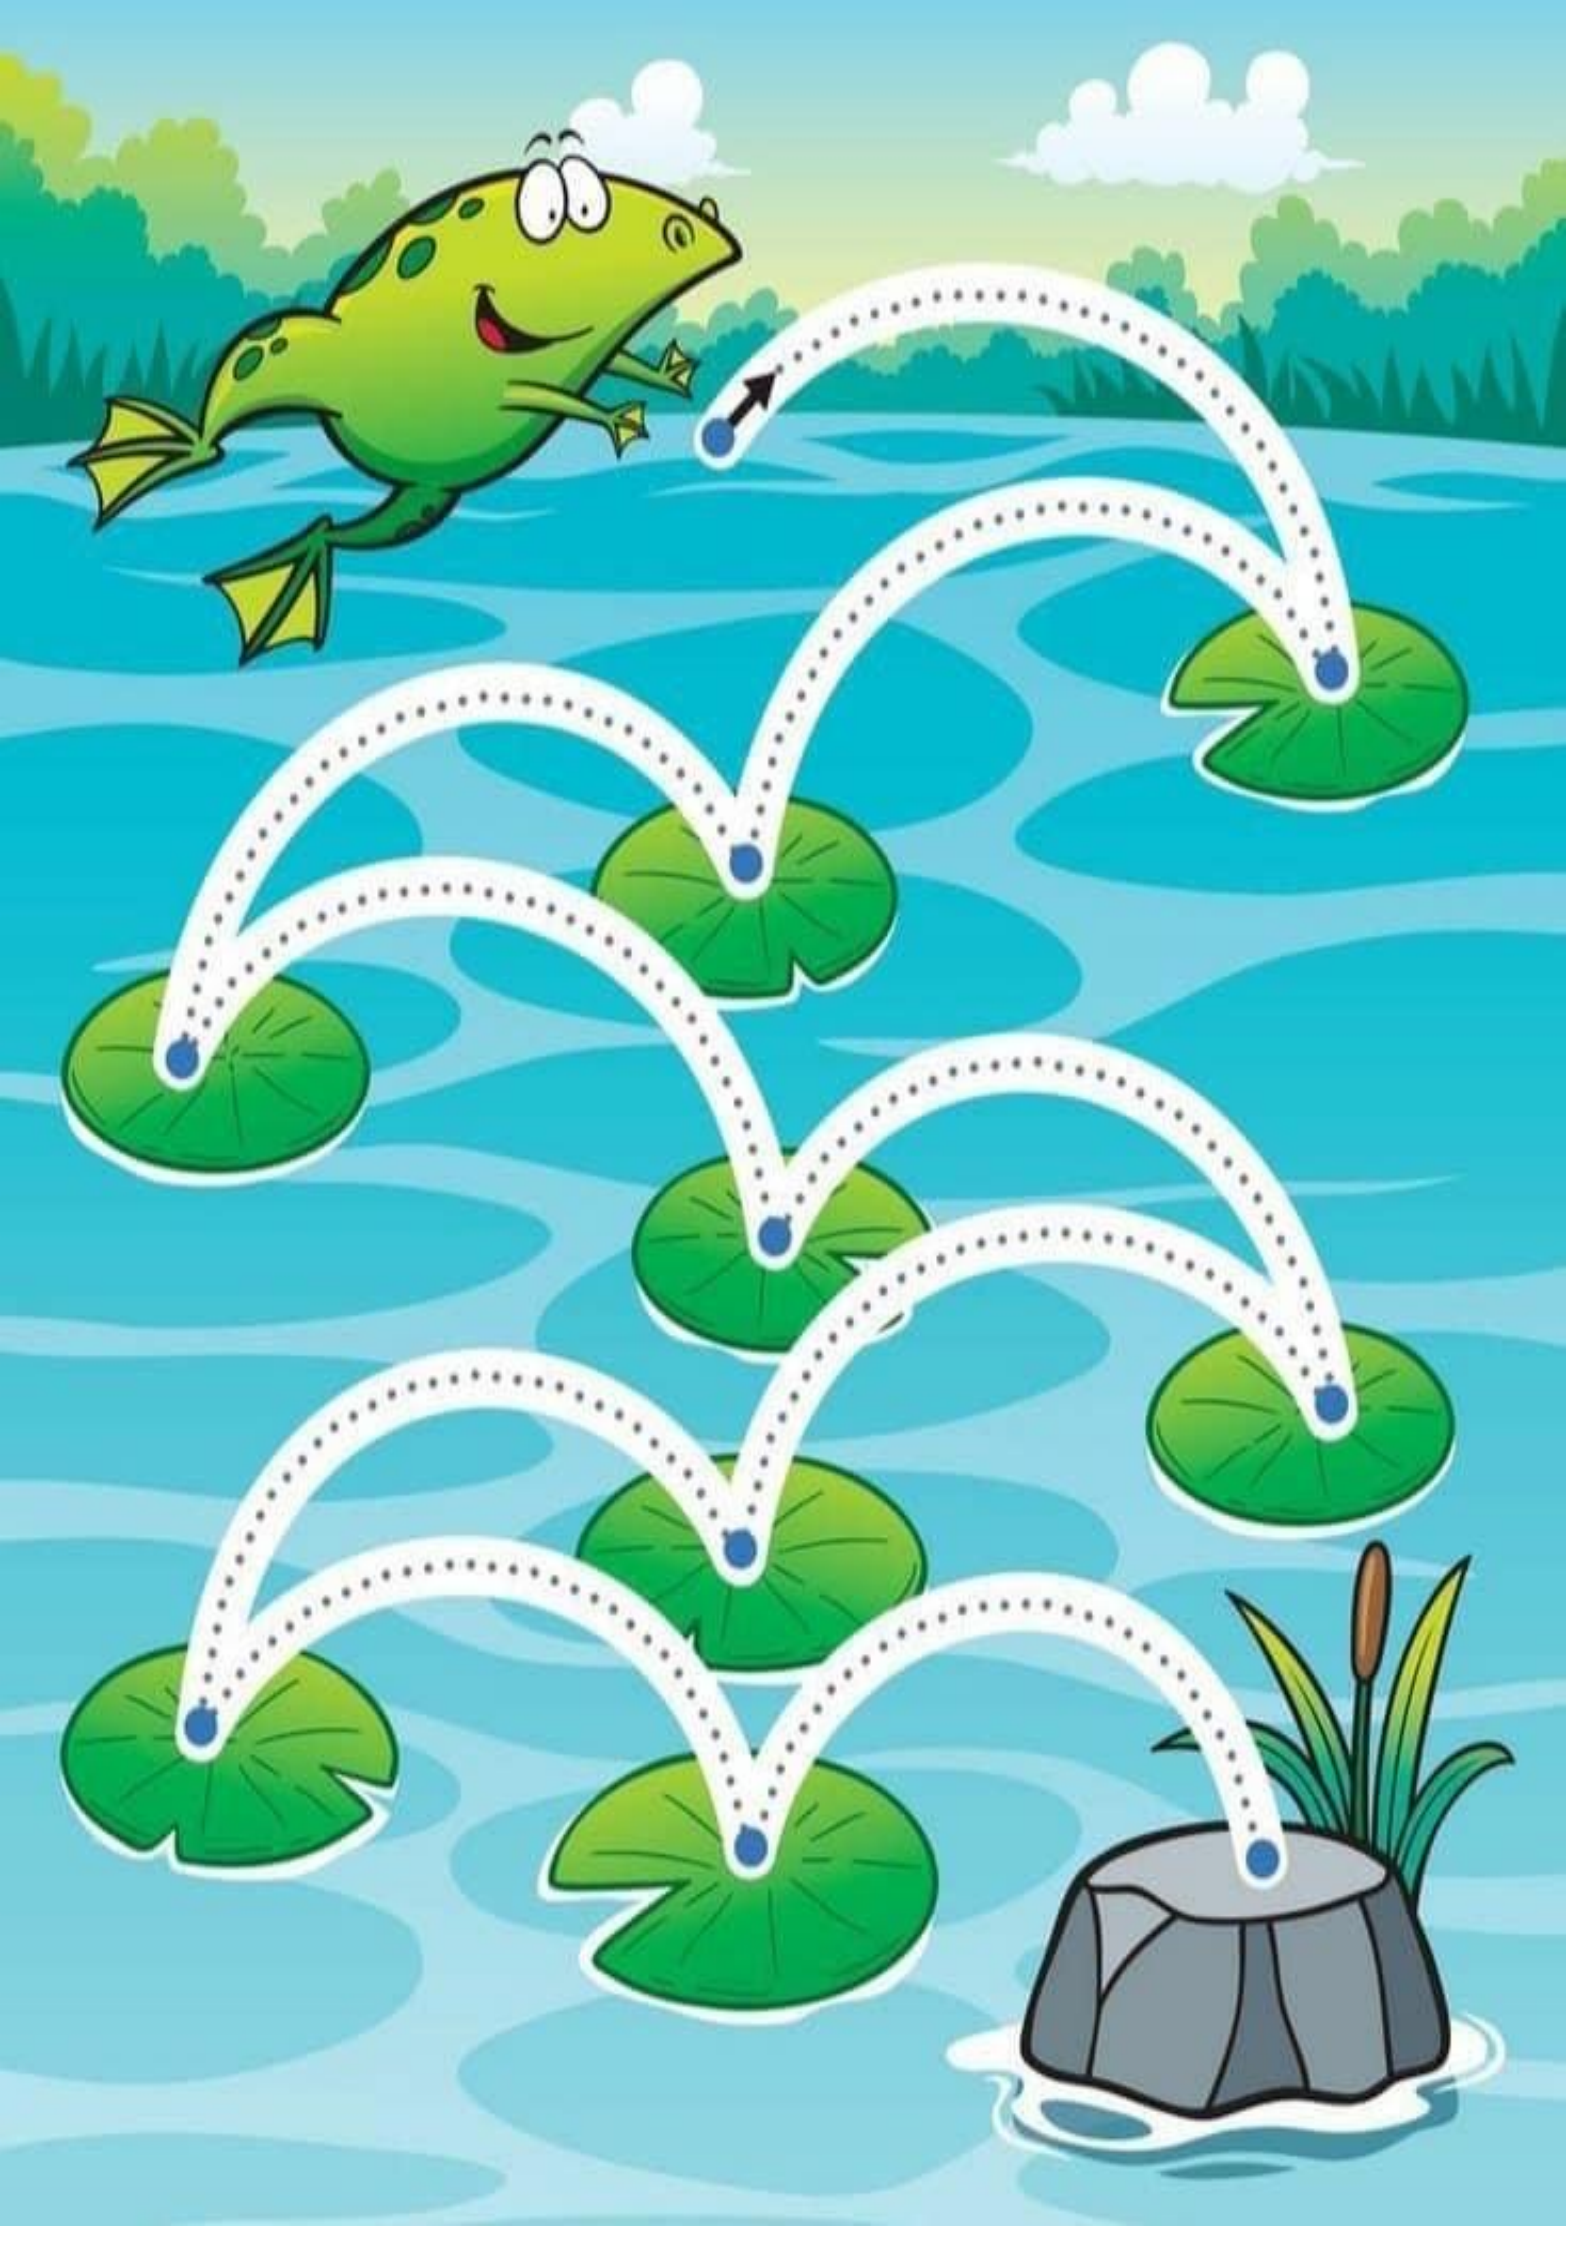

Make a flower garden.

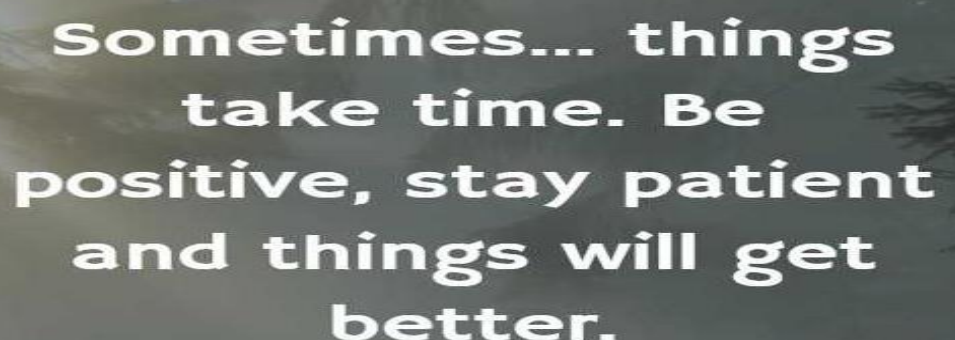

REMEMBER !!

Please:

- Send me week 2's work today !!
- If your child is doing it the wrong way, please let them do it the right way, show them the wrong way, and then the right way, please don't leave them to learn the wrong way !!
- For tracing, you can also draw your own lines, and let your child go over it 5 times, with different colours or the same colour.
- Please let the learners write down the alphabet, and numbers until 20 everyday.
- Let them put their fingers on the letters and numbers while counting and singing, a child is learning faster while seeing the letters and numbers.
- If you can not print the alphabet of numbers, you can write it yourself on a plain paper, and your child can work from it.

**Sometimes... things
take time. Be
positive, stay patient
and things will get
better.**
