NEW THEME DISCUSSION:

Endangered animals are animals that are likely to become endangered because of the loss of their homes and because people hunt or poach them for their horns. These animals need our protection. There are plenty of ways you can help to protect them. Some endangered species are: Rhinos, gorillas, whales, turtles and pandas.

Endangered Animals

BLACK RHINO

POPULATION: 5,000
SCIENTIFIC NAME: *Black rhinoceros*
HABITAT: Savannah
WEIGHT: 5,000 lbs
HEIGHT: 6 ft

Black rhinos are critically endangered. They are the only rhino species left in the world. They are found in savannas and woodlands in sub-Saharan Africa. They are hunted for their horns, which are used in traditional Chinese medicine. Their population has declined by 96% since 1970.

TIGER

POPULATION: 3,200
SCIENTIFIC NAME: *Tiger*
HABITAT: Forest
WEIGHT: 660 lbs
HEIGHT: 3 ft

Tigers are critically endangered. They are the largest cats in the world. They are found in forests in Asia. They are hunted for their skins and bones. Their population has declined by 96% since 1970.

WHALE

POPULATION: 10,000
SCIENTIFIC NAME: *Whale*
HABITAT: Ocean
WEIGHT: 100,000 lbs
HEIGHT: 30 ft

Whales are critically endangered. They are the largest animals on Earth. They are found in the oceans. They are hunted for their blubber. Their population has declined by 96% since 1970.

JAGUAR

POPULATION: 1,000
SCIENTIFIC NAME: *Jaguar*
HABITAT: Forest
WEIGHT: 250 lbs
HEIGHT: 4 ft

Jaguars are critically endangered. They are the largest cats in the Americas. They are found in forests in Central and South America. They are hunted for their skins and bones. Their population has declined by 96% since 1970.

POLAR BEAR

POPULATION: 25,000
SCIENTIFIC NAME: *Polar bear*
HABITAT: Arctic
WEIGHT: 1,500 lbs
HEIGHT: 8 ft

Polar bears are critically endangered. They are the largest bears in the world. They are found in the Arctic. They are hunted for their skins and bones. Their population has declined by 96% since 1970.

RED PANDA

POPULATION: 1,000
SCIENTIFIC NAME: *Red panda*
HABITAT: Forest
WEIGHT: 100 lbs
HEIGHT: 2 ft

Red pandas are critically endangered. They are the only pandas in the world. They are found in forests in China. They are hunted for their skins and bones. Their population has declined by 96% since 1970.

GIANT PANDA

POPULATION: 1,000
SCIENTIFIC NAME: *Giant panda*
HABITAT: Forest
WEIGHT: 250 lbs
HEIGHT: 4 ft

Giant pandas are critically endangered. They are the only pandas in the world. They are found in forests in China. They are hunted for their skins and bones. Their population has declined by 96% since 1970.

ORANGUTAN

POPULATION: 1,000
SCIENTIFIC NAME: *Orangutan*
HABITAT: Forest
WEIGHT: 150 lbs
HEIGHT: 4 ft

Orangutans are critically endangered. They are the only great apes in the world. They are found in forests in Indonesia. They are hunted for their skins and bones. Their population has declined by 96% since 1970.

CHIMPANZEE

POPULATION: 1,000
SCIENTIFIC NAME: *Chimpanzee*
HABITAT: Forest
WEIGHT: 150 lbs
HEIGHT: 4 ft

Chimpanzees are critically endangered. They are the only great apes in the world. They are found in forests in Africa. They are hunted for their skins and bones. Their population has declined by 96% since 1970.

LEATHERBACK TURTLE

POPULATION: 1,000
SCIENTIFIC NAME: *Leatherback turtle*
HABITAT: Ocean
WEIGHT: 1,500 lbs
HEIGHT: 3 ft

Leatherback turtles are critically endangered. They are the largest turtles in the world. They are found in the oceans. They are hunted for their shells. Their population has declined by 96% since 1970.

BLUEFIN TUNA

POPULATION: 1,000
SCIENTIFIC NAME: *Bluefin tuna*
HABITAT: Ocean
WEIGHT: 1,500 lbs
HEIGHT: 3 ft

Bluefin tunas are critically endangered. They are the largest fish in the world. They are found in the oceans. They are hunted for their meat. Their population has declined by 96% since 1970.

ASIAN ELEPHANT

POPULATION: 1,000
SCIENTIFIC NAME: *Asian elephant*
HABITAT: Forest
WEIGHT: 5,000 lbs
HEIGHT: 8 ft

Asian elephants are critically endangered. They are the largest animals in the world. They are found in forests in Asia. They are hunted for their skins and bones. Their population has declined by 96% since 1970.

NEW THEME DISCUSSION:

Endangered animals are animals that are likely to become endangered because of the loss of their homes and because people hunt or poach them for their horns. These animals need our protection. There are plenty of ways you can help to protect them. Some endangered species are: Rhinos, gorillas, whales, turtles and pandas.

Endangered Animals

BLACK RHINO

POPULATION: 5,000
SCIENTIFIC NAME: *Black rhinoceros*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The black rhino is one of the most endangered animals in the world. It is a large, thick-skinned animal with a single horn. It is found in the savannas of sub-Saharan Africa. Its population has declined by more than 90% since 1970. It is hunted for its horn, which is used in traditional Chinese medicine and as a status symbol. It is also hunted for its skin and bones.

TIGER

POPULATION: 1,000
SCIENTIFIC NAME: *Tiger*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The tiger is one of the most endangered big cats in the world. It is a large, striped cat that lives in the forests and grasslands of South and Central Asia. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

WHALE

POPULATION: 1,000
SCIENTIFIC NAME: *Whale*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The whale is one of the most endangered animals in the world. It is a large, marine mammal that lives in the oceans. Its population has declined by more than 90% since 1970. It is hunted for its blubber, which is used to make oil. It is also hunted for its skin and bones.

JAGUAR

POPULATION: 1,000
SCIENTIFIC NAME: *Jaguar*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The jaguar is one of the most endangered big cats in the world. It is a large, spotted cat that lives in the rainforests of Central and South America. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

POLAR BEAR

POPULATION: 1,000
SCIENTIFIC NAME: *Polar bear*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The polar bear is one of the most endangered animals in the world. It is a large, white bear that lives in the Arctic region. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

RED PANDA

POPULATION: 1,000
SCIENTIFIC NAME: *Red panda*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The red panda is one of the most endangered animals in the world. It is a small, reddish-brown bear that lives in the forests of the Himalayas. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

GIANT PANDA

POPULATION: 1,000
SCIENTIFIC NAME: *Giant panda*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The giant panda is one of the most endangered animals in the world. It is a large, black and white bear that lives in the forests of the Himalayas. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

ORANGUTAN

POPULATION: 1,000
SCIENTIFIC NAME: *Orangutan*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The orangutan is one of the most endangered animals in the world. It is a large, reddish-brown primate that lives in the rainforests of Borneo and Sumatra. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

CHIMPANZEE

POPULATION: 1,000
SCIENTIFIC NAME: *Chimpanzee*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The chimpanzee is one of the most endangered animals in the world. It is a large, black primate that lives in the rainforests of Central and West Africa. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

LEATHERBACK TURTLE

POPULATION: 1,000
SCIENTIFIC NAME: *Leatherback turtle*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The leatherback turtle is one of the most endangered animals in the world. It is a large, dark-colored turtle that lives in the oceans. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

BLUEFIN TUNA

POPULATION: 1,000
SCIENTIFIC NAME: *Bluefin tuna*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The bluefin tuna is one of the most endangered animals in the world. It is a large, silver fish that lives in the oceans. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

ASIAN ELEPHANT

POPULATION: 1,000
SCIENTIFIC NAME: *Asian elephant*
REQUIRE: 1,000
REQUIRE: 1,000
REQUIRE: 1,000

The Asian elephant is one of the most endangered animals in the world. It is a large, grey elephant that lives in the rainforests of South and Central Asia. Its population has declined by more than 90% since 1970. It is hunted for its skin and bones, which are used in traditional Chinese medicine. It is also hunted for its fur and as a trophy.

There are plenty of ways you can help to protect them. Some endangered species are: Rhinos, gorillas, whales, turtles and pandas.

Endangered Animals

BLACK RHINO

POPULATION: 5,000
SCIENTIFIC NAME: *Black rhinoceros*
GENUS: *Rhinoceros*
WEIGHT: 5,000 lbs
HABITAT: Savanna and bushland

Populations are declining due to the loss of their habitat and poaching. They are found in the savanna and bushland of Africa. They are the largest of the rhinos and are known for their thick skin and large horns. They are found in the savanna and bushland of Africa. They are the largest of the rhinos and are known for their thick skin and large horns.

TIGER

POPULATION: 1,000
SCIENTIFIC NAME: *Tiger*
GENUS: *Panthera*
WEIGHT: 600 lbs
HABITAT: Forest

The largest of all the big cats, tigers are found in the forests of Asia. They are known for their stripes and are the largest of the big cats. They are found in the forests of Asia. They are known for their stripes and are the largest of the big cats.

WHALE

POPULATION: 10,000
SCIENTIFIC NAME: *Whale*
GENUS: *Balaenoptera*
WEIGHT: 100,000 lbs
HABITAT: Ocean

Whales are the largest animals on Earth. They are found in the oceans of the world. They are known for their large size and are the largest of the animals on Earth. They are found in the oceans of the world. They are known for their large size and are the largest of the animals on Earth.

JAGUAR

POPULATION: 1,000
SCIENTIFIC NAME: *Jaguar*
GENUS: *Panthera*
WEIGHT: 400 lbs
HABITAT: Forest

Jaguars are the largest of the big cats in the Americas. They are found in the forests of Central and South America. They are known for their spots and are the largest of the big cats in the Americas. They are found in the forests of Central and South America. They are known for their spots and are the largest of the big cats in the Americas.

POLAR BEAR

POPULATION: 10,000
SCIENTIFIC NAME: *Polar bear*
GENUS: *Ursus*
WEIGHT: 1,500 lbs
HABITAT: Arctic

Polar bears are the largest of the bears. They are found in the Arctic region of the world. They are known for their white fur and are the largest of the bears. They are found in the Arctic region of the world. They are known for their white fur and are the largest of the bears.

RED PANDA

POPULATION: 1,000
SCIENTIFIC NAME: *Red panda*
GENUS: *Ailuropus*
WEIGHT: 100 lbs
HABITAT: Forest

Red pandas are the largest of the pandas. They are found in the forests of China. They are known for their red fur and are the largest of the pandas. They are found in the forests of China. They are known for their red fur and are the largest of the pandas.

GIANT PANDA

POPULATION: 1,000
SCIENTIFIC NAME: *Giant panda*
GENUS: *Ailuropus*
WEIGHT: 300 lbs
HABITAT: Forest

Giant pandas are the largest of the pandas. They are found in the forests of China. They are known for their black and white fur and are the largest of the pandas. They are found in the forests of China. They are known for their black and white fur and are the largest of the pandas.

ORANGUTAN

POPULATION: 10,000
SCIENTIFIC NAME: *Orangutan*
GENUS: *Pongo*
WEIGHT: 300 lbs
HABITAT: Forest

Orangutans are the largest of the apes. They are found in the forests of Indonesia. They are known for their orange fur and are the largest of the apes. They are found in the forests of Indonesia. They are known for their orange fur and are the largest of the apes.

NUMERACY & LIFE SKILLS - WEEK 10

WEDNESDAY 17 JUNE 2020

Count from 1 - 35

Count with them from 1 - 35 and thereafter let them count from 1 - 35 four times on their own.

Count from 10 - 1 backwards (10, 9, 8, 7, 6, 5, 4, 3, 2, 1)

Count with them from 10 - 1 and thereafter let them count from 10 - 1 four times on their own.

Write numbers 6 - 10 (REVISION)

Revise numbers 6 - 10

1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10

Count and Color

Count the different fishes and write the correct in the squares.

Numbers 1-5

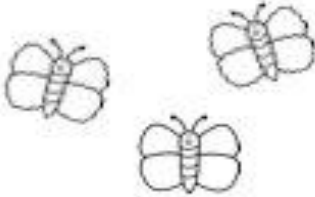

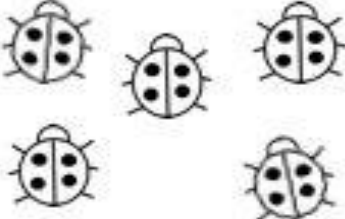

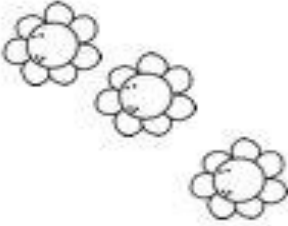

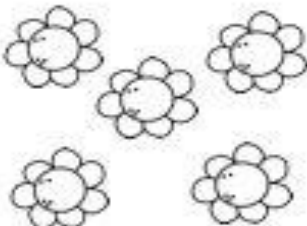

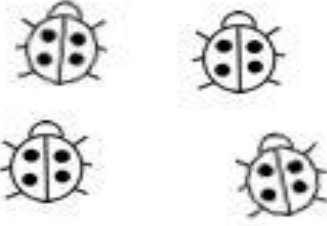

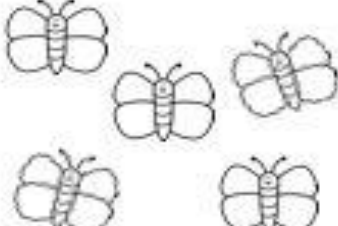

Name _____

How Many?

Count. Write the number.

THURSDAY 18 JUNE 2020

Count from 1 - 35

Count with them from 1 - 35 and thereafter let them count from 1 - 35 four times on their own.

Count from 10 - 1 backwards (10, 9, 8, 7, 6, 5, 4, 3, 2, 1)

Count with them from 10 - 1 and thereafter let them count from 10 - 1 four times on their own.

Write numbers 6 - 10 (REVISION)

Revise numbers 6 - 10

Writing numerals and number words

Write number 1 along with the number word.

1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10

Writing numerals and number words

Trace over the numerals and number words.

0 zero

1 one

2 two

3 three

4 four

5 five

FRIDAY 19 JUNE 2020

Count from 1 - 35

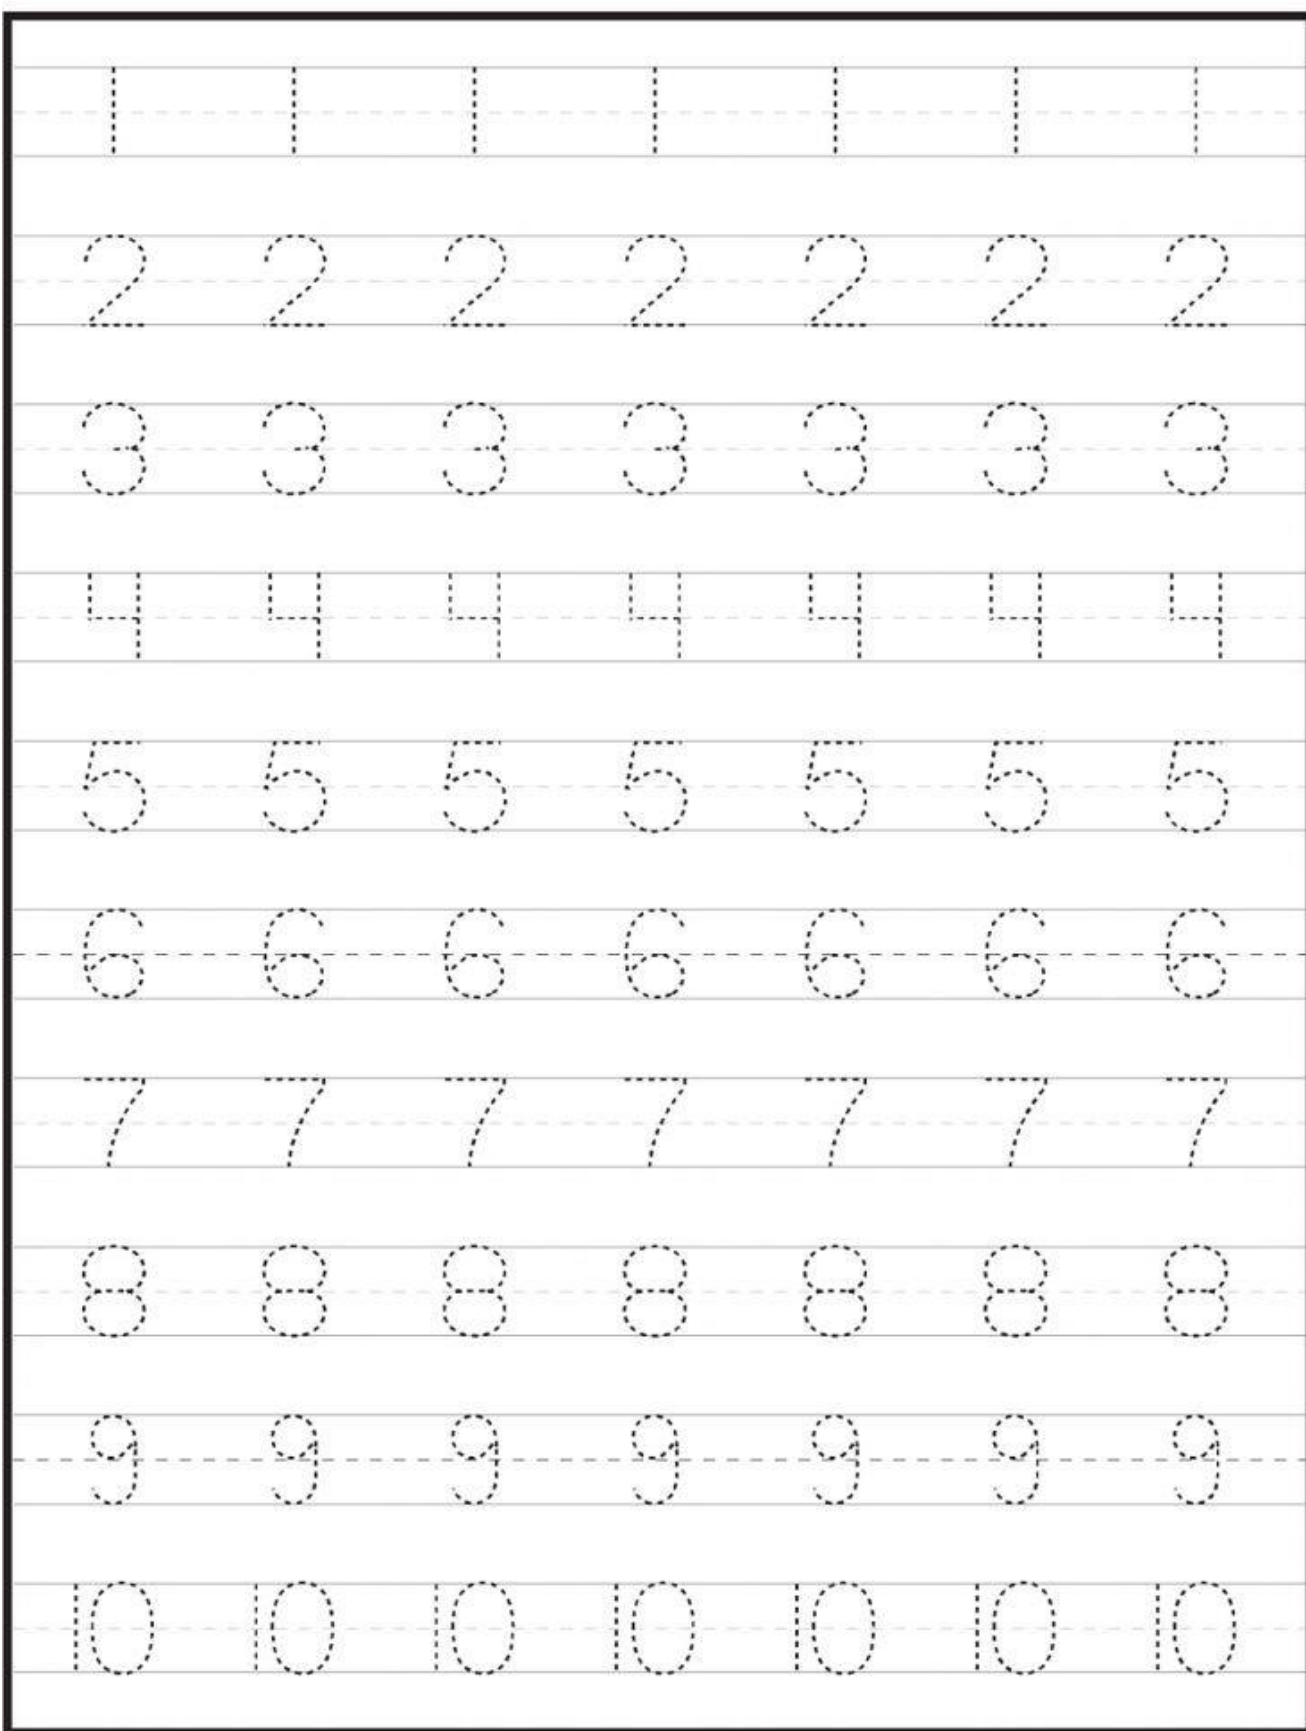

Count with them from 1 - 35 and thereafter let them count from 1 - 35 four times on their own.

Count from 10 - 1 backwards (10, 9, 8, 7, 6, 5, 4, 3, 2, 1)

Count with them from 10 - 1 and thereafter let them count from 10 - 1 four times on their own.

Write numbers 1 - 5 (REVISION)

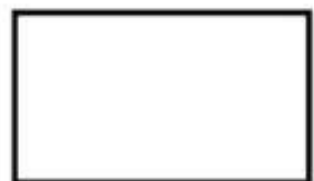

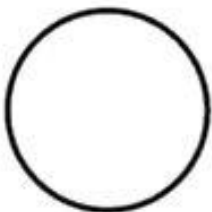

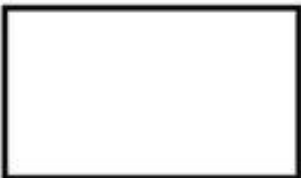

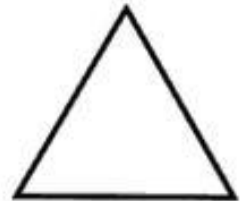

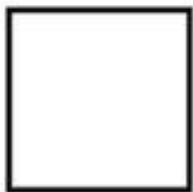

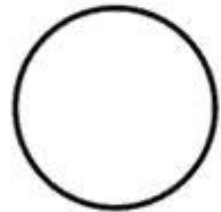

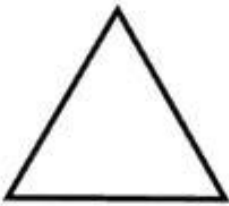

Revise numbers 6 - 10

Match the shapes

Match the shapes.

MATCH SHAPES
