

Week 7 memorandum

King cobra and the chicken

Compare

Both lay eggs

Both build nests

Both live on land

Contrast

The cobra is a reptile and the chicken is a mammal

The cobra eggs take 70-77 days to hatch and the chicken eggs take 21 days to hatch

After hatching the baby cobra snakes are on their own

After hatching the hen looks after the baby chicks.

The life cycle of the salmon

1 the eggs hatch into tiny salmon called alevin

2 The alevin become fry.

3 The fry become par

4 The par become smolt

5 In the smolt stage

6 the smolt becomes an adult salmon

7 the adult salmon will swim back to the river they were born in to lay their eggs there.

The life cycle of turtle

1 They lay their eggs in the sand on the beach

2 The eggs hatch into tiny turtles called hatchlings.

3 The hatchlings become juveniles

4 The Juveniles become sub adults.

5 The sub adults become adult turtles.

6 Turtles can live up to 100 years.

The lion and the mouse
